Sustainability Position Statement

Sustainability Vision

“To achieve the vision, the project commits to:

- Minimise adverse impacts to the natural and social environments during construction and operation
- Maximise beneficial environmental, economic and social outcomes for the community and industry
- Create places which are safe and desirable destinations
- Respect, preserve and promote cultural, heritage and community values
- The efficient use of material, energy and water resources
- Create partnerships with the community, stakeholders and industry
- Consider environmental, social and local economic aspects through the supply chain during procurement
- Deliver value for money by considering whole of life costs and benefits
- Identify and implement sustainable innovations
- Report regularly on the performance in meeting our sustainability commitments
- Create and maintain a legacy of skills within PTA and industry
